

L. Shawn Matott – Ph.D.

Computational Scientist, University at Buffalo,

Center for Computational Research,

701 Ellicott Street, Buffalo, New York 14203

phone: 716-652-3595 (home), 716-881-7566 (work)

e-mail: lsmatott@buffalo.edu, web: <https://www.buffalo.edu/ccr/about-us/people/staff/matott.html>

EDUCATION

2006

Ph. D. in Civil, Structural and Environmental Engineering

Dissertation Title: *Application of Heuristic Optimization to Groundwater Management*

University at Buffalo, Buffalo, NY (advisor: Alan J. Rabideau)

1997

B.Sci. in Computer Engineering (Mathematics Concentration)

Clarkson University, Potsdam, NY

RESEARCH INTERESTS

Numerical modeling of environmental and water resources systems, with an emphasis on:

- model assessment (e.g. uncertainty analysis, sensitivity analysis, parameter estimation, etc.)
- simulation-optimization procedures and parallel computing
- groundwater remediation and containment technologies
- stormwater management and combined sewer overflows
- nutrient cycling and loading, sorption processes, chlorinated solvents, pharmaceuticals
- large-scale modeling (i.e. regional or watershed scale) via geographic information systems (GIS)

PROFESSIONAL EXPERIENCE

2011-present

Computational Scientist, University at Buffalo (Buffalo, NY)

Primary duties are to provide outreach and maintenance of the high-performance computing (HPC) resources at the University at Buffalo's Center for Computational Research (UB CCR). Related activities include: updating 3rd party HPC software stacks and related libraries and scientific software; porting user-supplied software for use on UB CCR resources; and recruitment and training of new UB CCR users. Research activities include: numerical modeling of groundwater flow and contaminant transport; investigation of non-linear sorption processes in the sub-surface environment; and development of parallel algorithms for simulation-based optimization of groundwater remediation systems.

2009-2011

Assistant Professor, University of Waterloo (Waterloo, Ontario, Canada)

Duties included: teaching undergraduate engineering classes; supervising research assistants; pursuing research grants; publishing in peer-reviewed journals; departmental service tasks; and performing research and software development on behalf of Canada's hydropower, pharmaceutical and petroleum industries. Research activities included developing models and modeling tools to support the optimal design, uncertainty analysis and risk assessment of various engineered systems, including hydropower reservoirs, wastewater treatment plants, subsurface barriers, pump-and-treat well-fields, and carbon sequestration.

2006-2008

Post-doctoral Researcher, U.S. Environmental Protection Agency (Athens, GA)

Performed multidisciplinary research and development at the U.S. Environmental Protection Agency, Ecosystems Research Division (ERD), in Athens, Georgia. Research activities included: (1) Uncertainty Analysis (UA), Sensitivity Analysis (SA) and Parameter Estimation (PE) for Environmental Models and Multimedia Ecological Exposure Research - Primary duties: implementing UA/SA/PE techniques within an integrated environmental modeling software framework; and studying effects of land use change on ecosystems services. (2) Parallel Cluster Development - A multifaceted Linux-based solution to ERD supercomputing needs; involved integration with existing Windows-based node management software (i.e. Symantec Ghost) via PXE services; also involved deployment of two job scheduling and management solutions: a Java-based solution developed in-house and the industry-standard PBS/MPI solution.

2003-2006

Research Assistant, University at Buffalo (Buffalo, NY)

Research assistant duties included: (1) Grant Support - A significant contribution to NSF grant #CBET/BES-0202077, entitled "A regional scale high-performance reactive transport model"; (2) Grant Proposal Development - Assisted Dr. Alan Rabideau with the development of several grant proposals involving large-scale modeling of subsurface reactive transport and associated model evaluation issues; (3) Grid-based Groundwater Model Calibration - Extended parameter estimation software to execute in parallel on a grid of geographically distributed heterogeneous computing nodes; the work involved porting MPI-parallel calibration code to a variety of target operating systems and developing a web-based interface using PHP and Java-scripting; (4) Field-Work in Northern Wisconsin - Visited Wisconsin's Northern Highland Lakes Region (NHLR) and collected water samples and lake elevations for the characterization and calibration of a regional NHLR groundwater model. Data was collected using a combination of GIS software and a real-time kinematic global positioning system (RTK-GPS).

February 2005

Invited Research Consultant, USGS National Research Program (Boulder, CO)

Consulted with USGS researchers (Dr.'s Mary Hill and Eileen Poeter, among others) to prepare a research proposal ("Uncertainty analysis for computationally expensive hydrologic models").

Fall 2003 and Spring 2004

Coordinator, IGERT Colloquium and Speaker Series (Buffalo, NY)

Responsible for developing and promoting the weekly colloquium speaker schedule.

Summer 2002

Intern, New York State Center for Integrated Waste Management (Buffalo, NY)

A summer internship; integrated the ERRIN (environmental remediation and restoration information network) database and the ArcGIS software.

1997-2001

Senior Software Engineer, Clearwire Technologies (Buffalo, NY)

Clearwire developed wireless Internet access products operating in the unlicensed 2.4 GHz band. The work provided valuable experience in software design, development, and documentation.

Modeling Regional Groundwater Flow with the Analytic Element Method: Source Water Assessment and GIS. *Short course for professional engineers/hydrologists* (1.6 CEUs), University at Buffalo, June 29: Buffalo, NY. (Taught ~3 hours)

RESEARCH GRANTS

HPC^{NY} Supplemental Funds, Rensselaer Polytechnic Institute, **\$50,000**, 2017 (PI)

RENEW SEED Grant, University at Buffalo, **\$34,979**, 2017 (co-PI)

Stormwater Research Grant, City of Buffalo, **\$1,001,201**, 2015-2019 (Sr. Personnel)

Travel Grant, American Institute of Mathematics, **\$2,500**, 2015 (PI)

Discovery Grant, Canada's Natural Sciences and Engineering Research Council, **\$90,000**, 2011-2015 (PI)

Dean's Award, University of Waterloo, **\$40,000**, 2010 (PI)

Startup Grant, University of Waterloo, **\$45,000**, 2009 (PI)

GRADUATE STUDENT SUPERVISION

Mahyar Shafii. University of Waterloo, Civil and Environmental Engineering (Ph.D., 2009-2014). *Developments in Informal Multi-Criteria Calibration and Uncertainty Estimation in Hydrological Modelling* (co-advisor: Dr. B. Tolson)

Nasim Hosseini. University of Waterloo, Civil and Environmental Engineering (M.A.Sc., 2009-2011). *Modelling Temporal and Spatial Transportation of Pharmaceuticals, Personal Care Products, and Endocrine Disrupting Compounds in a Canadian Watershed* (co-advisor: Dr. W. Parker)

TEACHING EXPERIENCE

Spring 2014

Instructor, **GIS Applications in Civil Engineering**

University at Buffalo, Buffalo, NY

Graduate course (CIE 507) with an enrollment of 9 students.

Winter 2011

Instructor, **Engineering for Solid Waste Management**
University at Waterloo, Waterloo, ON, Canada
Undergraduate course (ENVE 577) with an enrollment of 60 students.

Winter 2010, Winter 2011

Instructor, **Advanced Mathematics in Civil Engineering**
University at Waterloo, Waterloo, ON, Canada
Undergraduate course (CIVE 331) with an enrollment of 94 (W2010) and 97 (W2011) students.

Spring 2009, Spring 2011

Instructor, **Advanced Mathematics in Environmental and Geological Engineering**
University at Waterloo, Waterloo, ON, Canada
Undergraduate course (ENVE 321) with an enrollment of 43 (S2009) and 60 (S2011) students.

Spring 2006

Instructor, **Civil Engineering Applications of GIS**
University at Buffalo, Buffalo, NY
Graduate course (CIE 507) with an enrollment of 9 students.

Fall 2004 and Fall 2005

Guest Lecturer, **Hydrologic Engineering and Statistical Methods in Civil Engineering**
University at Buffalo, Buffalo, NY
Graduate/undergraduate courses with enrollment of 10-13; taught units on atmospheric water and methods of regression.

Fall 1996 and Spring 1997

Recitation Instructor, **Differential Equations**
Clarkson University, Potsdam, NY
Assisted ~20 undergraduates with homework and exam preparation; administered quizzes.

FELLOWSHIPS / CERTIFICATES / AWARDS

2012

Coalition for Academic Scientific Computation (CASC) Cover Art Competition
The winning entry "*High Performance Computing for Designing Groundwater Remediation Systems*" appeared on the cover of the 2012 CASC brochure.

2009

Calibration and Predictive Uncertainty Analysis for Complex Environmental Models
A 3-day short course given by Dr. John Doherty and covering advanced features of the PEST parameter estimation package, including Tikhonov regularization, SVD-assist, and null-space Monte Carlo.

2008

US EPA Office of Research and Development Science Communications Award
Recognizing outstanding contributions in publishing peer-reviewed articles focused on current and emerging issues in water resources engineering and management.

2008

US EPA 'S' Award – Superior Accomplishment Recognition Award
Recognizing key contributions to the development of modeling technologies within the Multimedia Ecosystem Exposure Research Team.

2006

Advanced Graduate Certificate: Concentration in Geographic Information Science
Certification administered by the SUNY at Buffalo Department of Geography for completion of coursework related to geographic information science.

2001-2006

IGERT Fellowship in Geographic Information Science
Interdisciplinary NSF-sponsored Integrative Graduate Education and Research Training fellowship in the field of geographic information science under the supervision of University at Buffalo's National Center for Geographic Information and Analysis (award # DGE-9870668)

2005

CSEE Departmental Chair's Recognition Award

The award is given in recognition of high scholastic achievement and outstanding service to the department of Civil, Structural and Environmental Engineering at the University at Buffalo.

COMPUTER SKILLS

Programming Experience: Fortran, C/C++, PHP, Python, MatLab, Java/Java Scripts, bash, csh, perl, R
Operating Systems: Windows, Linux (RedHat, CentOS), VxWorks, Windows CE
Software Packages: MS Office, Source Safe, SVN, GIT, ArcGIS, MODFLOW/MT3DMS, PHREEQC, Ghost
Standards/Libraries: TCP/IP, Sockets, SQL, PBS/Torque, SLURM, MPI, OpenMP, CUDA, OpenCL
Parallel Computing: Grid Computing, Beowulf Clusters, SHARCNET, SUPERMUSE, UB CCR
Numerical Modeling: Finite Differences & Elements, Analytic Elements, Streamlines, Operator Splitting

SOFTWARE DEVELOPMENT

STUBL – A collection of supplemental tools and utility scripts for SLURM.
OSTRICH – A model-independent multi-algorithm tool for model calibration and simulation-optimization.
NIGHTHAWK – Models the fate and transport of biogeochemically sensitive materials in the subsurface.
PIGEON – A program for interfacing models with MatLab and Python optimization routines.
ISOFIT – A software code for fitting a variety of isotherms to laboratory data.

PROFESSIONAL AFFILIATIONS

American Geophysical Union (AGU), National Ground Water Association (NGWA), American Society for Engineering Education (ASEE), Society for Industrial and Applied Mathematics (SIAM)

PROFESSIONAL SERVICE

Manuscript Peer-Review

I have reviewed manuscripts on behalf of Ground Water Monitoring & Remediation, Water Resources Research, Journal of Contaminant Hydrology, Journal of Hydrology, Advances in Water Resources, Journal of Environmental Engineering, Water Research, Environmental Modeling & Software, and IEEE Transactions on Evolutionary Computation. I have also performed several internal peer reviews on behalf of EPA colleagues.

Software Peer-Review

Hsieh PA, Matott LS. 2004. SVFlux and ChemFlux: Software for Two-Dimensional/Three-Dimensional Finite Element Variably Saturated Flow and Transport Modeling. *Ground Water*, vol. 42, no. 6, pg. 804-808, doi:10.1111/j.1745-6584.2004.tb02738.x -- *a review of the SVFlux and ChemFlux software*

Software Distribution and Support

Executables and user-manuals for all software listed in 'SOFTWARE DEVELOPMENT' are freely available for download. I also provide e-mail technical support on request and as schedule permits.
